Page 1 of 22 Series 8920, 9200, 9300, 9400 Service Center Guide Home » Bissell » Bissell 8930, 9200, 9300 Series Proheat 2X User Guide Document 8930, 9200, 9300 SERIESPROHEAT 2X®USER GUIDEIMPORTANT SAFETY INSTRUCTIONSREAD ALL INSTRUCTIONS BEFORE USING YOUR DEEP CLEANER.When using an electrical appliance, basic precautions should be observed, including the following:WARNINGTo reduce The risk of fire, electric shock, or injury:Connect to a properly grounded outlet only. See grounding instructions. Do not modify the 3-prong grounded plug.Do not leave appliance when it is plugged in. Unplug from outlet when not in use and before servicing Use indoors only.Do not allow to be used as a toy. Close attention is necessary when used by or near children.Do not use for any purpose other than described in this User's Guide. Use only the manufacturer's recommended attachments.Do not use with damaged cord or plug. If the appliance is not working as it should or has been dropped, damaged, left outdoors, or dropped into water, have it repaired at an authorized service center.Always install float before any wet pick-up operation.Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.Do not handle plug or appliance with wet hands.Do not put any object into openings. Do not use with any opening blocked, keep openings free of dust, lint, hair, and anything that may reduce air flow.Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.Turn off all controls before plugging or unplugging appliance.Use extra care when cleaning on stairs.Do not use to pick up flammable or combustible materials (lighter fluid, gasoline, kerosene, etc.) or use in areas where they may be present.Do not use appliance in an enclosed space filled with vapors given off by oil base paint, paint thinner, some moth-proofing substances, flammable dust, or other explosive or toxic vapors.Do not use to pick up toxic material (chlorine bleach, ammonia, drain cleaner, etc.).Do not pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes. Use only BISSELL cleaning products intended for use with this appliance to prevent internal component damage. See the Cleaning Fluid section of this guide.Unplug before connecting TurboBrush Tool.Do not immerse. Use only on dry surfaces or surfaces moistened by the cleaning process.Keep appliance on a level surface.Do not carry the appliance while in use.SAVE THESE INSTRUCTIONS FOR FUTURE USEThis model is for household use only. Commercial use of this unit voids the manufacturer's warranty.WARNINGImproper connection of the equipment-grounding conductor can result in a risk of electrical shock. Check with a qualified electrician or service person if you aren't sure if the outlet is properly grounded. DO NOT MODIFY THE PLUG. If it will not fit the outlet, have a proper outlet installed by a qualified electrician. This appliance is designed for use on a nominal 120-volt circuit, and has a grounding attachment plug that looks like the plug in the illustration. Make certain that the appliance is connected to an outlet having the same configuration as the plug. No plug adapter should be used with this appliance.GROUNDING INSTRUCTIONSThis appliance must be connected to a grounded wiring system. If it should malfunction or break down, grounding provides a safe path of least resistance for electrical current, reducing the risk of electrical shock. The cord for this appliance has an equipment-grounding conductor and a grounding plug. It must only be plugged into an outlet that is properly installed and grounded in accordance with all local codes and ordinances.Thanks for buying a BISSELL deep cleaner. We're glad you have completely assembled it per the above instructions and are familiar with all instructions and operating procedures.Special featuresYour Bissell ProHeat 2X deep cleaner is a home cleaning system that uses the power of heat, brushes, and cleaning formula to get the deep-down dirt for a maximum clean. Not only does it come with several unique features, it has been designed with you, the customer, in mind.Built-in-Heater featureBissell ProHeat 2X models all feature a patented built-in heater that will heat the hot tap water you put in up to 25 degrees hotter to safely optimize cleaning effectiveness. The heater will never allow the temperature to exceed 190°F. The heater switch on the front of the machine controls the heater so you have the option to turn off the heat if you are cleaning delicate wool or oriental rugs.2-in-1 Water Tank Our 2-in-1 water tank full capacity system is designed with a heavy-duty bladder inside for clean water. As you clean, the clean water in the bladder will empty and mix with the cleaning formula. Dirty water pulled out of your carpets will collect around the outside of the bladder so that clean and dirty water is always kept separate. This allows the user to only carry one tank to and from the sink for emptying and filling.ReadyTools™ DialThis provides either floor cleaning or above floor cleaning with the turn of a knob. Choose "TOOLS" setting for stairs, upholstery, and hard-to-reach areas and "FLOOR CleaniNG" for carpets, area rugs, and bare floors.Before you cleanATTENTIONSome Berber carpets have a tendency to fuzz with wear. Repeated strokes in the same area with an ordinary vacuum or deep cleaner may aggravate this condition. Please see Stain Removal instructions on page 10.Move furniture to another area if cleaning an entire room (optional).Pick up all loose dirt, debris, and pet hair before deep cleaning. If you're cleaning just a small area of carpeting or less than a whole room, the ProHeat 2X Deep Cleaner may be used to vacuum the area before deep cleaning. If so, be sure to keep the red filter screen hat the 2-in-1 tank lid) cleaned off lint so that suction is maintained. When you're done, clear the red filter screen and then rinse both the dirty water and the clean solution tank (inside the flexible bladder) with warm water before starting the deep cleaning process.Plan your cleaning route to leave an exit path. It is best to begin cleaning in the corner farthest from your exit.Pre-treating (optional)Pre-treating is recommended to improve cleaning effectiveness for heavily soiled carpet in high traffic areas such as entryways and hallways.BISSELL Stain PreTreat a. spray the bissell stain PreTreat formula onto heavy traffic areas, soiled areas, or stains.b. Allow to penetrate for at least 3 minutes.c. Clean as normal, using the bissell ProHeat 2X machine on the high traffic setting, following the instructions below.Carpet cleaningWARNINGTo reduce the risk of fire and electric shock due to internal component damage, use only BISSELL cleaning fluids intended for use with the deep cleaner.Fill the 2-in-1 Water Tank. Remove the tank from the base of the machine by lifting up the tank carry handle. Carry like a bucket to the sink.a. Unlatch the top of the tank from the bottom by lifting up on the tank latch located on the back of the tank.b. Remove the top of the tank by lifting up the tank. How the lip on the top tank separates from the groove in the bottom tank. This placement is important when putting the tank back together.c. Fill the heavy-duty bladder with clean hot (140°F/60°C MAX) tap water. Do not boil or microwave water as it can destroy the bladder.d. leaving the filled bottom of the tank on a flat surface, only maneuver the top of the tank. To attach the top part of the tank to the bottom, carefully hook the lip on the top tank into the groove on the bottom tank.e. Fasten tanks together by securing the latch in the back.Note: Remember to secure the tank latch in the back and test to make sure it is secure before picking up the tank and moving it. If the latch does not latch properly, the tank may not be sealed properly.f. Fill the formula tank from back of machine.Fill the formula tank by first unscrewing the cap and insert. Always use genuine bissell 2X formulas to maximize cleaning and for the safety of your machine. Fill with water to WATER line and then fill up to FORMULA line with bissell 2X Concentrated formula. Rinse the formula tank at the same time, and refill as needed.Water rinse (recommended). Rinsing is an optional step that can be done during the cleaning process or after the carpeted area has been completely cleaned. switch to the water rinse setting, on the Custom Clean dial and follow the same path as you did for cleaning. Take care to do a forward (wet) stroke by depressing the trigger, and a backward (dry) stroke, followed by a forward and backward (dry) stroke, releasing the trigger. Continue this until the water you see coming up the nozzle is clear. (see page 13 for more machine care tips.)Cleaning with attachmentsWARNINGTo reduce the risk of injury, be extra careful when cleaning stairs. Make sure machine is secure and level.Your ProHeat 2X machine comes equipped with a hose and at least one attachment for cleaning stairs, upholstery, and more.Important! if using to clean upholstery, check upholstery tags.a. Check manufacturer's tag before cleaning. "W" or "Ws" on the tag means you can use your ProHeat 2X. If the tag is coded with an "X" or an "s" (with a diagonal stripe through it), or says "Dry Clean Only", do not proceed with any deep cleaning machine. Do not use on velvet or silk. If the manufacturer's tag is missing or not coded, check with your furniture dealer.b. Check for colorfastness in an inconspicuous place.c. if possible, check upholstery stuffing. Colored stuffing may bleed through fabric when wet.d. Plan activities to allow upholstery time to dry.e. Pick up any loose dirt, debris, and pet hair before deep cleaning.Follow the instructions on page 7 for filling the 2-in-1 water tank and the formula tank.Set ReadyTools dial to the "TOOLS" setting. This will allow spray and suction from the hose. Set Custom Clean dial for heavy traffic, normal clean, light clean, or water rinse as desired. Attach the cleaning tool to the end of the hose.Plug in and turn on the power switch and heater (if desired).NOTE: If your deep cleaner came with a Deep Reach tool or Stain trapper tool, do not follow the cleaning instructions below. Instead, follow the instructions in the next section.Clean by pressing the trigger to spray solution onto the area to be cleaned. slowly move the tool back and forth over the soiled surface. Release the trigger to suction soiled water. Continue to clean in the area, working in small sections, until no more dirt can be removed. Rinse (optional) and turn the power switch and heater ON (I).Slowly move the machine forward and back over hard floor surface one time while depressing trigger. Caution: Do not overwet.Repeat the motion without pressing the trigger using the hard floor tool to squeeze and suction up the dirty water.Allow adequate time for floors to dry.Remove hard floor tool, rinse and dry before storing.Rinse out the formula tank.Maintenance & CareWARNINGTo reduce the risk of electric shock, turn power switch off and disconnect plug from electrical outlet before performing maintenance or troubleshooting checks.Once your cleaning is complete, make sure the 2-in-1 water tank is emptied, rinsed out, and dried before the next use. The formula tank can remain filled and ready to go.NOTE: Store cleaner in a protected, dry area. Since this product uses water, it must not be stored where there is a danger of freezing. freezing will damage internal components and void the warranty.Machine CareFor best results, a few simple steps can assure your machine is well maintained after your cleaning is complete.Flush your machine of any remaining residual solution.a. Fill the 2-in-1 clean water tank with clean hot tap water.b. Store your machine into a proper outlet and set the Custom Clean dial to the rinse setting. Turn the power on by pressing the power button.c. Recline the handle and press the spray trigger for 15 seconds while making forward and backward passes on carpet. Release the trigger to suction. Repeat for another 15 seconds. Continue without pressing the trigger until there is no more water being suctioned.Turn power and heater switch OFF (O). Unplug the machine and wrap the power cord. empty the 2-in-1 water tank.Rinse out 2-in-1 water tank, with running hot tap water, taking care to clean underneath the heavy-duty bladder, and all around it.The top half of the tank can be rinsed clean through the nozzle area. Also, pop out the red filter underneath the top half of the tank and rinse. Replace before putting the top and bottom halves of the tank together.Before you place the cleaned 2-in-1 water tank back onto the machine, remove the red solution filter cap (on the base of the machine). Remove the cap by inserting a coin or a flat head screwdriver into the slot on the top. Turn counterclockwise and unscrew. set aside.a. Remove the white filter by grasping the post and pulling up and out of the unit. Rinse the filter under cold water.Note: be careful not to drop the filter into the sink or disposal.b. Replace the white filter back into the filter area.Note: make sure the white filter is seated properly before placing the red solution filter cap.c. Replace the red solution filter cap and turn clockwise to tighten.Keeping the 2-in-1 water tank off of the base of the machine, simply unscrew the floor nozzle using a Phillips head screwdriver. This can be rinsed out at the faucet. Then replace back onto the machine by starting from the bottom of the nozzle and hooking the tabs into the holes on the bottom sides of the machine. secure into place with the screw.The inside of the end caps by the brush rolls can be wiped out with a clean paper towel, or, if a more thorough cleaning is desired, the end caps can be taken off using a Phillips head screwdriver and rinsed clean. Replace after cleaning.Any loose hair or debris can be pulled from the brush rolls and thrown away. For the most thorough clean before storage, follow directions for removal and replacement of the brush rolls and belts.To clean attachments that may have been used, remove from hose and rinse under clean, running water. Dry and replace attachment in the tool caddy. Clean the hose by suctioning clean water from the tap, before replacing, lift the end of hose and stretch out to ensure all water is cleared from hose. Refer to page 10.After carpet is dry, vacuum again to remove hair and fuzz.Small belt removal and replacementWARNINGTo reduce the risk of electric shock, turn power switch off and disconnect plug from electrical outlet before performing maintenance or troubleshooting checks.Occasional replacement of one or both belts may become necessary. if that is needed, pleasefollow the instructions below.Turn off the machine, and unplug it from the outlet.Remove both the 2-in-1 water tank and the formula tank. set aside.Unscrew the front nozzle and remove it. set aside.Turn the machine on its side.IMPORTANT: cord side down.Remove the clear end cap by unscrewing the 2 black screws. Take care not to drop the screws into the unit.Remove 1 silver screw.Remove pivot arm by gently lifting up.Remove small brush belt.Replace small brush belt, and reverse steps above.Brush removal and large belt replacementBrushes can be removed for cleaning or replacement as needed.Follow small belt removal instructions above.Remove brush rolls by pulling them off of the metal rods. Be careful not to lose the small washer at each end of the brush rolls.Place cleaned or new brush rolls back onto the rods. Make sure one washer is on each end of the rollers prior to sliding onto the rod. be sure to let the rod slide through the bushing to insure proper fit.Re-attach the long belt on the bottom to the cogs of the small roller brushes.Place small belt over back roller and metal cog.Place pivot arm in place and screw in place using the silver screw.Re-attach clear end cap by tightening with the (2) black screws.Return front nozzle to front of unit, by latching from underneath and then securing with a screw. if you have any questions or are having trouble installing or replacing your belt(s) or brushes, please call BISSELL Consumer Care.TroubleshootingWARNINGTo reduce the risk of electric shock, turn power switch off and disconnect plug from electrical outlet before performing maintenance or troubleshooting checks.ProblemPossible causesRemedies Built-in heater daylight does not illuminateThe heater switch is not turned ON (I)Turn the heater switch ON (I)The power switch is not turned ON (I)both switches must be ON (I) to activate the heater ready light Reduced no sprayWater tank may be emptyFill formula tank with Bissell 2X Formula for cleaningTank may not be seated completelyTurn power OFF (O).
